

## Waterproof Cable Jumper

### Description:

The waterproof tail cable is a special kind of indoor fiber optic cable which is Made by the single core fiber optic cable as the basic element. Cable in 2~12 single Core cable in non metal centers strengthen surrounding elements sequentially in A clockwise order around outside with water blocking yarn package, with steel or Aluminum belt for metal armoring layer strengthening and seal, to fit the material as the sheath.

### Feature:

1. Excellent mechanical and environmental performance
2. Flame retardant (or non-delay) performance  
Meets the requirements Of the standard;

### Applications:

1. For pigtail and jumper;
2. Optical connection for Optical communication  
Equipment room and Optical distribution frame;
3. For indoor wiring

### Parameter:

Name	Units	Values		
Connector	/	FC, SC, ST, LC, MU, SMA		
Mode	/	SM		MM
surface	dB	UPC	APC	PC
Insertion Loss	dB	0.25	0.3	0.2
Return loss	dB	≥50	≥65	≥35
Core Qty.	/	2, 4, 6, 8, & 12 fibers		
Fiber Type	/	SM: OS1, OS2 MM: OM1, OM2, OM3, OM4		
Storage temperature	°C	-40~+85
